Full Stack & Mobile Application Developer

PROFESSIONAL SUMMARY

Full Stack & Mobile Developer with experience building scalable web and mobile applications using Angular, .NET Web API, MAUI, and MySQL. Worked on live production systems and CRM modules with strong focus on API development, performance, and clean architecture.

TECHNICAL SKILLS

Backend

- .NET Core / .NET 8
- C#, Web API
- Entity Framework, Dapper

Frontend

- Angular, TypeScript
- HTML, CSS, Bootstrap
- JavaScript

Mobile

- .NET MAUI
- XAML UI Components

Database

- MySQL / MySQL Workbench

Tools

- Visual Studio

- VS Code
- GitHub
- Thunder Client

Soft Skills

- Problem Solving
- Smart & Analytical Thinking
- Quick Learner
- Team Collaboration
- Calm & Dedicated

PROFESSIONAL EXPERIENCE

Junior Software Developer

E2o Technologies Private Limited — Madurai
Aug 2025 – Present

- **Developing and delivering end-to-end features for a live production system using Angular, .NET Web API, MAUI, and MySQL**
- **Designed and implemented core modules including booking workflows, trip management, driver allocation, and admin dashboards**
- **Built and optimized REST APIs using .NET 8, Dapper, and Entity Framework for performance and scalability**
- **Developed MAUI mobile application screens for customer interactions and booking operations**
- **Improved UI consistency and system performance, resolving critical issues across modules**

Software Developer Intern

E2o Technologies Private Limited — Madurai

July 2025 – Aug 2025

Projects & Work Done During Internship

CRM System – Leave & Attendance Module

- Created complete Leave Request

  Management page with validation logic

- Implemented Check-In / Check-Out calculation formula for accurate attendance tracking
- Built and updated database tables for attendance module
- Enhanced UI consistency and integrated APIs for seamless data flow

Kavi Travels – Travel Management System

- Implemented export features: Print, Word, Excel, PDF
- Improved table UI/UX and created additional report pages
- Integrated backend APIs and resolved bugs
- Improved overall navigation and user flow

PROJECTS

☆ OnCall Acting Driver (Live Production Project)

Full Stack Developer | Angular • .NET Web API • MAUI • MySQL

- Developed a driver booking system with web and mobile applications used in production
- Built booking workflow including trip creation, driver mapping, and fare calculation
- Developed REST APIs for trip lifecycle, driver updates, and admin dashboards
- Worked on both frontend (Angular) and backend (.NET Web API) modules
- Developed MAUI mobile screens for booking, trip tracking, and user actions
- Integrated APIs for real-time data flow and seamless user experience
- Optimized performance, fixed bugs, and improved UI consistency across modules

---

☆ E-Commerce (Single Vendor) – Ongoing Project

Full Stack Developer | Angular • .NET 8 • MySQL • MAUI

- Built complete coupon and deals module with dynamic generation and discount logic
- Implemented full order lifecycle including placement, cancellation, and return management
- Integrated courier partner (Delhivery) APIs for shipment creation, tracking, and delivery updates
- Developed AWB tracking system for real-time shipment monitoring
- Worked on both frontend and backend development
- Developed mobile features including product listing and user interaction screens
- Designed product pages inspired by Amazon-style UI/UX

☆ Influencer Platform (Mobile Application)

Mobile Developer | .NET MAUI

- Developed mobile features for an influencer discovery platform
- Built filtering and discovery screens for selecting artists
- Implemented artist selection and rejection logic
- Designed responsive UI for smooth navigation
- Integrated backend APIs for dynamic data updates

☆ Multi-Tenant CRM System

Backend Developer | .NET Web API • MySQL

- Developed Expense module with dynamic fields
- Built Task management system with flexible field structure Implemented dynamic reporting system (date-wise, monthly, yearly)
- Created bulk import features with item-level calculations
- Developed batch history tracking with stock reduction logic
- Built reusable APIs across multiple modules (quotation, invoice, product, etc.)
- Designed dynamic analytics system using configurable fields

☆ **Personal Portfolio Website**

Frontend Developer | Angular • TypeScript • Three.js • GSAP • Gemini AI

- Developed interactive portfolio using Angular and TypeScript
- Implemented advanced animations using Three.js and GSAP
- Integrated AI chatbot using Google Gemini API
- Designed modern responsive UI with smooth transitions
- Deployed using Vercel

EDUCATION

B.Sc. Computer Science (B.Sc CS)

Mannar Thirumalai Naicker College, Madurai

Affiliated to Kamarajar University

Year of Completion: 2025

ADDITIONAL TECHNICAL KNOWLEDGE

- Completed Full MERN Stack Training

(MongoDB, Express.js, React.js, Node.js)
